About me

Passionate and results-oriented Software Engineer with solid experience in building scalable web applications and APIs using modern technologies. Proven ability to design, develop, and deliver high-quality software solutions aligned with business needs. Strong background in backend and frontend development, agile methodologies, and cloud-based systems. Recognized for problem-solving skills, team collaboration, and a continuous improvement mindset. Adept at working in fast-paced environments, learning new technologies quickly, and maintaining code quality through best development practices.
